

When The Enemy comes

*Sometimes Brother I really do remember:
People I once knew fought until surrender
By looking in their eyes I just had no doubt
For fighters like them there is no easy way out*

*I never had to adapt cause I'm just like them
The heart of a fighter ready to fight when
Something gets easy you know that it's wrong
Joy and pain even love and peace are among*

*Fight for your own, lift your head high
Show the world how brave you are
But never forget when something get 's wrong
Sometimes instead of yours the enemy comes along*

*Do not expect them to help you
They walked the same way until they came through
And when you feel lonely it might be so true
Cause you are damn scared when you took around you*

*But when there is a hand which tries to help you
It could be that its injuries belong to the man who
You once tried to really fight back
A turning point in a situation like that*

*When there is a war there some time will be peace, too
When the turning point comes- none of yours will help you
And when you re so young and know nothing about peace
Enjoy the feeling and embrace situations like these*
