

Main Enemy: WAR

The soldiers came into the cities with lot of weapons-
Now they are gone and left a lot of victims.

They were aggressive and brutal.

The civilians were exhausted and innocent.

The soldiers had no respect for children and elderly people.

The soldiers used violence, hate and anger for their tasks.

The civilians used innocent faces for their lives.

The enemies of the population were the brutal soldiers.

The enemy of the soldiers was the fear of death.

But the main enemy of both groups was WAR.
